Baby Pediatric Symptom Checklist (BPSC)

Scoring Directions, 12/14/15

1. The *BPSC* is divided into three subscales, each with 4 items. Determine the *BPSC* subscale scores by assigning a “0” for each “Not at All” response, a “1” for each “Somewhat” response, and a “2” for each “Very Much” response, and then sum the results.

    a. In the event that parents have selected multiple responses for a single question and are unavailable for further questioning, then choose the more concerning answer (i.e. "Somewhat" or "Very Much") farthest to the right.
    b. In the event that there is a missing response, that item counts as zero.

2. Any summed score of 3 or more on any of the three subscales indicates that a child is “at risk” and needs further evaluation or investigation.
