Share with your child's doctor

Things to share and consider

- What are some things you and your baby do together?
- What are some things your baby likes to do?
- Is there anything your baby does or does not do that concerns you?
- Has your baby lost any skills he/she once had?
- Does your baby have any special healthcare needs or was he/she born prematurely?

You know your child best. Don't wait. If your child is not meeting one or more milestones, has lost skills he or she once had, or you concerns, act early. Talk with your child's doctor, share your concerns, and ask about developmental screening.

If you or the doctor are still concerned

- Ask for a referral to a specialist who can evaluate your child more; and
- Call your state or territory's early intervention program to find out if your child can get services to help. Learn more and find t at cdc.gov/FindEI.

Tips and activities

What you can do for your 2-month-old

As your baby's first teacher, you can help his or her development.

As your baby's first teacher, you can help his or her learning and brain development. Try these simple tips and activities in a safe w your baby's doctor and teachers if you have questions or for more ideas on how to help your baby's development.

- Respond positively to your baby. Act excited, smile, and talk to him when he makes sounds. This teaches him to take turns "talki forth in conversation.
- Talk, read, and sing to your baby to help her develop and understand language.
- Spend time cuddling and holding your baby. This will help him feel safe and cared for. You will not spoil your baby by holding or him.

More parenting tips and activities

- Being responsive to your baby helps him learn and grow. Limiting your screen time when you are with your baby helps you b responsive.
- Take care of yourself. Parenting can be hard work! It's easier to enjoy your new baby when you feel good yourself.
- Learn to notice and respond to your baby's signals to know what she's feeling and needs. You will feel good and your baby v and loved. For example, is she trying to "play" with you by making sounds and looking at you, or is she turning her head awa or becoming fussy because she needs a break?
- Lay your baby on his tummy when he is awake and put toys at eye level in front of him. This will help him practice lifting his Do not leave your baby alone. If he seems sleepy, place him on his back in a safe sleep area (firm mattress with no blankets, bumper pads, or toys).
- Feed only breast milk or formula to your baby. Babies are not ready for other foods, water or other drinks for about the first 6 life.
- Learn when your baby is hungry by looking for signs. Watch for signs of hunger, such as putting hands to mouth, turning hea breast/bottle, or smacking/licking lips.
- Look for signs your baby is full, such as closing her mouth or turning her head away from the breast/bottle. If your baby is no it's ok to stop feeding.
- Do not shake your baby or allow anyone else to—ever! You can damage his brain or even cause his death. Put your baby in a and walk away if you're getting upset when he is crying. Check on him every 5–10 minutes. Infant crying is often worse in th months of life, but it gets better!
- Have routines for sleeping and feeding. This will help your baby begin to learn what to expect.
- Hold a rattle off to one side of your baby's head, shake it, and see if your baby looks for the noise.
- Practice staying calm when your baby is upset by talking softly, holding, rocking, or singing to her. This will help her calm do lessen her stress and fears.
- Limit screen time (TV, tablets, phones, etc.) to video calling with loved ones. Screen time is not recommended for children yo 2 years of age. Babies learn by talking, playing, and interacting with others.
- Talk and play with your baby while feeding, dressing, and bathing.
- Help your baby learn some ways to self-soothe by letting her suck on her fingers or a pacifier.
- Copy your baby's sounds and see how long your baby "talks" by making sounds back and forth with you.
- Place a baby-safe mirror near your baby so she can look at herself. She will begin to develop a sense of who she is.
- Look at pictures with bright colors or faces with your baby and talk about them.
